DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-4 are rejected under 35 U.S.C. 103(a) as being unpatentable over Eames.

Eames shows the use of a plurality of flexible layers (12,18) of non-uniform stiffness having a flexible pad (16) therebetween. Side edges of the layers are fastened together form a pair of generally parallel seams (29). A stiffener layer (26) is disposed between the flexible layers.

Eames shows all of the teachings of the claimed invention except the use of at least three flexible layers. It would have been an obvious multiplicity of parts to modify the seat of Eames with at least three flexible layers since such a modification would have been within the level of one ordinary skill in the art.

3. Claims 1-3 are rejected under 35 U.S.C. 103(a) as being unpatentable over Robinson.

Robinson shows the use of a plurality of flexible layers (18,19) of non-uniform stiffness having a flexible pad (17) therebetween. Side edges of the layers are fastened together form a pair of generally parallel seams (L). Robinson shows all of the teachings of the claimed invention except the use of at least three flexible layers. It would have been an obvious multiplicity of parts to modify the seat of Robinson with at least three flexible layers since such a modification would have been within the level of one ordinary skill in the art.

Response to Arguments

4. Applicant's arguments filed 8/25/03 have been fully considered but they are not persuasive. In response to applicant's argument that neither Eames nor Robinson shows the use of at least three flexible layers of non-uniform thickness, applicant is directed to the above rejection.

Allowable Subject Matter

5. Claim 20 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
